Product Information

ProGuard CVT Fluid

ProGuard CVT Fluid is a high performance, synthetic, continuously variable transmission fluid formulated specifically for use in most service fill CVT applications. It provides smooth and consistent wet clutch performance and the carefully selected blend of base oils and additives is optimized for excellent metal to metal friction characteristics between metal belt and pulley.

ProGuard CVT Fluid will provide optimal low temperature flow properties, shear stability, anti-wear protection, oxidation stability and effective foam control. This fluid is compatible with common organic seal materials, imparting oil leakage control.

Applications

ProGuard CVT Fluid meets the requirements of:

Toyota, Nissan, Mitsubishi, Saturn and Subaru vehicles with metal belt CVTs where CVT fluid is required, and Audi chain drive CVTs.

Exceptions are those models with toroidal or dry CVTs. Always consult vehicle owner's manual for fluid recommendations.

Typical Characteristics

ProGuard CVT Fluid

Appearance	Red Liquid
Viscosity, ASTM D-445 cSt. at 100° C	7.1
Brookfield Viscosity, ASTM D-2983 cP. at -40° C	14,000
Flash Point, ASTM D-92 °C (°F)	185 (365)
Rust Test, ASTM D-665A	Pass
