Product Information

Universal G-BLUE Antifreeze

Universal G-BLUE Antifreeze is an inhibited ethylene glycol based coolant formulated with the latest nitrite-organic acid technology (NOAT) to create a high quality extended life ethylene glycol antifreeze/coolant for newer model cars and light duty trucks, that can be used for top-off or fill. Its special blend of long-lasting inhibitors is designed to protect all engine cooling systems for a minimum of five years or 300,000 miles, when used as directed.

For long life and best corrosion protection, a 50% **Universal G-BLUE Antifreeze** solution is recommended. If water condition is questionable, we recommend distilled water. This provides freezing protection to -34°F, and boil-over protection to +265°F.

Universal G-BLUE Antifreeze is formulated to satisfy the following specifications: ASTM D6210, ASTM D3306, ASTM D4985, SAE J1034, and SAE J1941. **Universal G-BLUE Antifreeze** is compatible with GM 6277M DEX Cool.

Typical Properties

Universal G-BLUE Antifreeze	Concentrate	50/50 Pre-Mix
Product Code Number	412171	412172
Ethylene Glycol, %	92	46
Appearance	Blue, Transparent	Blue, Transparent
Specific Gravity, at 60 °F	1.120-1.140	1.060-1.090
Reserve Alkalinity (min.)	3	1
Max. Freeze Point, °C (°F)	-37 (-34)**	-37 (-34)

*** Freeze point when diluted to 50% solution*
